Index of Authors

Note. Pages in *Proceedings of the Biochemical Society* are distinguished by P.

ABDULLAH, M., FLEMING, I. D., TAYLOR, P. M. & WHELAN, W. J. Substrate specificity of the amyloglucosidase of *Aspergillus niger* 35P

ABELSON, D. & BOYLE, A. Effects of ultraviolet radiation on nicotinic acid and related compounds 19P

ABOU AKKADA, A. R., EADIE, J. M. & HOWARD, B. H. The biochemistry of rumen protozoa. 7. The carbohydrases of *Polyplastron multivesiculatum* (Dogiel & Fedorowa) 268

ADAMS, D. H. The uptake of guanine, uracil, lysine and glycine by ascites cells pretreated with azaserine and 6-thioguanine 240

ADINOLFI, A. *see* RUFFO, A. 50P

AEBI, H., HEINIGER, J. P. & SUTER, H. Some properties of red cells and other tissues from normal and acatalatic humans 63P

ALIFANO, A. *see* QUAGLIARIELLO, E. 56P

ALLEN, D. M. *see* WHITEHEAD, R. G. 84P

AMBLER, R. P. The amino acid sequence of *Pseudomonas* cytochrome *c*-551 349

AMBLER, R. P. The purification and amino acid composition of *Pseudomonas* cytochrome *c*-551 341

ARCHER, B. L., AUDLEY, B. G., COCKBAIN, E. G. & MCSWEENEY, G. P. The biosynthesis of rubber. Incorporation of mevalonate and isopentenyl pyrophosphate into rubber by *Hevea brasiliensis*-latex fractions 565

ARNSTEIN, H. R. V. *see* COX, R. A. 574

ASCOLI, F., BOTRÉ, C. & SOLINAS, M. Polyelectrolyte behaviour of soluble ribonucleic acid 6P

ASHWORTH, L. A. E. & GREEN, C. The action of enzymes on human α-lipoprotein 561

ATHERTON, N. M. *see* MASSEY, V. 54P; SWOBODA, B. E. P. 37P

ATKINSON, M. R., MORTON, R. K. & MURRAY, A. W. Inhibition of inosine 5′-phosphate dehydrogenase from Ehrlich ascites-tumour cells by 6-thioinosine 5′-phosphate 167

ATKINSON, M. R. *see also* FILSELL, O. H. 92

AUDLEY, B. G. *see* ARCHER, B. L. 565

BACH, S. J., HAWKINS, R. A. & SWAINE, D. A short method for the purification of arginase from ox liver 263

BACON, J. S. D. The occurrence of apiose in polysaccharide fractions from certain plants 103P

BACON, J. S. D. *see also* MACDONALD, I. R. 104P

BAKER, B. A., MWASI, L. & CRAWFORD, M. A. Oxygen–citrate–glucose extraction and utilization by the baboon kidney (*Papio anubis vigilis*) 69P

BAKER, W. W. & NEWBURGH, R. W. Intracellular distribution of isocitrate–nicotinamide–adenine dinucleotide phosphate-oxidoreductase activity during development of the chick embryo 510

BALÁZS, R. Control of glutamate metabolism in brain and liver mitochondrial systems 44P

BALDWIN, R. L. & SHOOTER, E. M. On the replication of deoxyribonucleic acid in *Escherichia coli* 9P

BANNISTER, W. H. Acid secretion and oxygen consumption by isolated frog gastric mucosa 62P

BANWELL, J. & CRAWFORD, M. A. The identification and occurrence of indolylacrylylglycine, an unexpected metabolite of tryptophan, in the urine of East Africans 69P

BARNABY, C. F. *see* PLASKETT, L. G. 479

BARNLEY, G. R. Observations on the development of *Onchocerca volvulus* Leukart in *Simulium damnosum* Theob. and *Simulium neavei* Roub. 70P

BARRY, J. M., BARTLEY, W., LINZELL, J. L. & ROBINSON, D. S. The uptake from the blood of triglyceride fatty acids of chylomicra and low-density lipoproteins by the mammary gland of the goat 6

BARTLEY, W. *see* BARRY, J. M. 6

BEADLE, L. C. & VISSER, S. A. Metabolic studies on the swamp worm *Alma emini* 71P

BEADLE, M. *see* BLIGH, J. 72P

BEECHEY, R. B. *see* BURRIN, D. H. 111P

BEEVERS, H. *see* MACLENNAN, D. H. 316

BERGSTRÖM, S., CARLSON, L. A. & ORÖ, L. Effects of prostaglandins on catecholamine-induced changes in the free fatty acids of plasma in the dog 27P

BETTS, G. F. *see* HEWITT, E. J. 20P

BILLEK, G. *see* SCHOLDA, R. 31P

BIRKINSHAW, J. H., LUCKNER, M., MOHAMMED, Y. S., MOTHES, K. & STICKINGS, C. E. Studies in the biochemistry of micro-organisms. 114. Viridicatol and cyclopenol, metabolites of *Penicillium viridicatum* Westling and *Penicillium cyclopium* Westling 196

BLACKMAN, V. & LEONARD, P. J. Body spaces in healthy East Africans 71P

BLASCHKO, H. *see* BUFFONI, F. 111P

BLIGH, J. & BEADLE, M. The continuous radio-telemetric recording of deep body temperature of some African mammals 72P

BOOTH, D. A. Effects of anoxia on gangliosides in cerebral tissues and dispersions 112P

BORETTI, G. The biosynthesis of vitamin B_{12} in micro-organisms 3P

BORRELL, S. Urinary steroids of cats. Absence of 17-oxo steroids 51

BORRELL, S. Urinary steroids of cats. Corticosteroid-like substances 54

BOTRÉ, C. *see* ASCOLI, F. 6P

BOWMAN, I. B. R. *see* GRANT, P. T. 89P

BOWYER, D. E., LEAT, W. M. F., HOWARD, A. N. & GRESHAM, G. A. The use of thin-layer chromatography and gas–liquid chromatography in the determination of the fatty acid composition of the major phospholipids and neutral lipids 24P

BOYLAND, E., NERY, R., PEGGIE, K. S. & WILLIAMS, K. The metabolism and possible mode of action of urethane 113P

BOYLE, A. *see* ABELSON, D. 19P

BRAHMANANDAM, S. *see* NAGARAJAN, B. 66P

BRANDER, W. *see* MAGGI, V. 28P

BREMER, J. A possible function of carnitine in the carbohydrate sparing of fatty acid oxidation 25P

BREWER, T. H. *see* WOESSNER, J. F., JUN. 75

BRIDGES, R. G. *see* CRONE, H. D. 11

BRONK, J. R. The influence of changes in thyroid-hormone level on the rate of amino acid incorporation by rat-liver mitochondria *in vitro* 16P

BROOKES, P. & LAWLEY, P. D. Effects of alkylating agents on T2 and T4 bacteriophages 138

BROOKES, P. *see also* LAWLEY, P. D. 127

BROWN, D. M. Stepwise degradation of polyribonucleotides 1P

BROWN, G. L., LEE, S. & MCMULLEN, D. W. Sequence studies of amino acid transfer ribonucleic acid 2P

BROWN, J. R. & HARTLEY, B. S. The disulphide bridges of chymotrypsinogen A 59P

BRUMBY, P. E. & MASSEY, V. Some properties of xanthine–oxygen oxidoreductase isolated from pig liver 46P

BUDILLON, G. *see* QUAGLIARIELLO, E. 56P

Index of Subjects

Note. Pages in *Proceedings of the Biochemical Society* are distinguished by P.

Acetoacetate, α-oxoglutarate and isocitrate as hydrogen donors for reduction of, in rat-liver mitochondria (Tager, J. M.) 55P

Acetylcholine activity of brain extracts, chromatographic behaviour of (McLennan, H., Curry, L. & Walker, R.) 163

Acid–base properties of ribonucleic acid from rabbit-reticulocyte ribosomes (Cox, R. A. & Arnstein, H. R. V.) 574

Acid secretion and oxygen consumption by isolated frog gastric mucosa (Bannister, W. H.) 62P

Acid, sensitivity of neuraminosidic linkage in muco-substances to (Gibbons, R. A.) 380

Acids, 'compartmentation' of, in plant tissues (MacLennan, D. H., Beevers, H. & Harley, J. L.) 316

Aconitase, plant, relationship between iron and activity of (Palmer, M. J.) 98P

Actinomycin D, inhibition of mammalian deoxyribonucleic acid nucleotidyltransferase by (Keir, H. M., Omura, H. & Shepherd, J. B.) 425

Actomyosin, presence of, in dilution precipitate from salt extracts of pregnant and non-pregnant uterus (Needham, D. M. & Williams, J. M.) 534

Adenosine triphosphatase, activity of proteins from uterine muscle as (Needham, D. M. & Williams, J. M.) 552

Adenosine-triphosphatase activity of yeast hexokinase and specific inactivation of the enzyme (de la Fuente, G. & Sols, A.) 36P

Adenosine triphosphate–creatine phosphotransferase from ox brain, properties and function of (Wood, T.) 210

Adenosine 5′-triphosphate–creatine phosphotransferase, mechanism of action of (Watts, D. C.) 220

Adenosine triphosphate, uptake of water by perch sperm tails and its dependence on hydrolysis of (Tibbs, J.) 97P

Aerobacter aerogenes, conversion of shikimic acid into anthranilic acid and phenylpyruvic acids by cell-free extracts of (Morgan, P. N., Gibson, M. I. & Gibson, F.) 229

Albumin, measurement of rates of synthesis of (McFarlane, A. S.) 277

Albumin, plasma, human, effect of, on action of insulin in isolated rat diaphragm (Jervell, J.) 31P

Albumin, serum, osmotic pressure of mixtures of hyaluronic acid and (Laurent, T. C. & Ogston, A. G.) 249

Albumin, serum, sequential synthesis of, by microsome fraction from rat liver (Sargent, J. R. & Campbell, P. N.) 16P

Alcohol dehydrogenase, liver, charge distribution and polar/non-polar groups in (McKinley-McKee, J. S. & Donninger, C.) 52P

Alcohols, inhibitory action of, on D-glucuronolactone dehydrogenase (Marsh, C. A.) 108

Aldono-(1→5)-lactones, synthesis of, and their inhibitory properties towards glycosidases (Conchie, J., Hay, A. J. & Levvy, G. A.) 103P

Alkaloids, preliminary survey of East African plants for (Peal, W. J. & Patel, M. S.) 82P

Alkoxy lecithins of ox heart (Renkonen, O. & Hirvisalo, E. L.) 29P

Amine oxidase of pig plasma, crystalline preparation of (Buffoni, F. & Blaschko, H.) 111P

Amino acid composition and purification of *Pseudomonas* cytochrome *c*-551 (Ambler, R. P.) 341

Amino acid incorporation and ribonucleic acid turnover in rat-liver submicrosomal fractions (Hallinan, T. & Munro, H. N.) 95P

Amino acid incorporation with single ribosomes (Munro, A. J., Jackson, R. J. & Korner, A.) 12P

Amino acid metabolism and salicylate in the rat (Huggins, A. K. & Smith, M. J. H.) 112P

D-Amino acid oxidase, mechanism of action of (Massey, V., Gibson, Q. H., Curti, B. & Atherton, N. M.) 54P

Amino acid sequence of *Pseudomonas* cytochrome *c*-551 (Ambler, R. P.) 349

Amino acids and related compounds in fishes (Cowey, C. B.) 107P

Amino acids, anomaly in time-course of incorporation of, into transfer ribonucleic acid (Mansbridge, J. N. & Korner, A.) 15P

Amino acids, effect of antibiotics on incorporation of, into protein of protoplast membranes of *Bacillus megaterium* (Yudkin, M. D.) 290

Amino acids, effect of, on thermally reconstituted collagen (Candlish, J. K. & Tristram, G. R.) 97P

Amino acids, effect of X-irradiation on activation of, in nuclei from rat thymus gland (Smit, J. A. & Stocken, L. A.) 37

Amino acids, excretion of, in primary hepatoma and liver cirrhosis (Somers, K.) 83P

Amino acids, free, of the green banana 'matoke' (*Musa* sp.) (Manek, P. V. & Fripp, P. J.) 79P

Amino acids, insulin and incorporation of, into protein of rat heart (Manchester, K. L. & Wool, I. G.) 202

Amino acids, serum, imbalance of, in children with kwashiorkor (Whitehead, R. G.) 84P

Amino acids, tritium-labelled, incorporation of, into insulin in ox pancreas *in vitro* (Taylor, K. W. & Parry, D. G.) 94P

Ammonia, fluoroacetate and metabolism of, in brain (Lahiri, S. & Quastel, J. H.) 157

α-Amylase, activity of, in extracts of *Polyplastron multivesiculatum* (Abou Akkada, A. R., Eadie, J. M. & Howard, B. H.) 268

Amylases, rat-intestinal, two, separation and characterization of (Dahlqvist, A. & Thomson, D. L.) 272

Amyloglucosidase of *Aspergillus niger*, substrate specificity of (Abdullah, M., Fleming, I. D., Taylor, P. M. & Whelan, W. J.) 35P

Annelids, electron-microscope studies of high-molecular-weight haemoglobins and chlorocruorins of (Roche, J.) 108P

Anopheles gambiae, sexual activity of (Goma, L. K. H.) 75P

Anthranilic acid, conversion of shikimic acid into, by cell-free extracts of *Aerobacter aerogenes* and *Escherichia coli* (Morgan, P. N., Gibson, M. I. & Gibson, F.) 229

Antibiotics, effect of, on incorporation of amino acids into protein of protoplast membranes of *Bacillus megaterium* (Yudkin, M. D.) 290

Antrycide, interaction of, with isolated ribosomes (Newton, B. A.) 93P

Apiose, occurrence of, in polysaccharide fractions from certain plants (Bacon, J. S. D.) 103P

Arginase from ox liver, purification of (Bach, S. J., Hawkins, R. A. & Swaine, D.) 263

Arginase inhibitor from sunflower seeds (Reifer, I. & Morawska, G.) 51P

L-Arginine–adenosine triphosphate phosphotransferases, inhibition of, by iodoacetamide (Ruiz Cruz, J., Virden, R. & Watts, D. C.) 110P

Ascites-carcinoma cells, Ehrlich, polystyrene-particle uptake by (Roberts, J. & Quastel, J. H.) 150
Ascites cells pretreated with azaserine and 6-thioguanine, uptake of guanine, uracil, lysine and glycine by (Adams, D. H.) 240
Ascites-tumour cells, Ehrlich, inhibition of inosine 5′-phosphate dehydrogenase from, by 6-thioinosine 5′-phosphate (Atkinson, M. R., Morton, R. K. & Murray, A. W.) 167
Ascites-tumour cells, Landschutz, mechanism of formation of thymidine 5′-mono-, 5′-di- and 5′-tri-phosphate by enzymes from (Grav, H. J. & Smellie, R. M. S.) 486
Aspergillus niger, substrate specificity of amyloglucosidase of (Abdullah, M., Fleming, I. D., Taylor, P. M. & Whelan, W. J.) 35P
Avidin, nature of binding site for biotin of (Green, N. M.) 599
Avidin, purification and composition of (Melamed, M. D. & Green, N. M.) 591
Avidin, stability of, at extremes of pH and dissociation into sub-units by guanidine hydrochloride (Green, N. M.) 609
Avidin, use of [^{14}C]biotin for kinetic studies and assay of (Green, N. M.) 585
Azaserine, uptake of guanine, uracil, lysine and glycine by ascites cells pretreated with 6-thioguanine and (Adams, D. H.) 240

Bacillus megaterium, the effect of penicillin, novobiocin, streptomycin and vancomycin on membrane synthesis by protoplasts of (Yudkin, M. D.) 290
Bacitracin-catalysed hydrolysis of aryl esters (Elmore, D. T. & Smyth, J. J.) 58P
Bacteria, washed disks of storage tissue free from (MacDonald, I. R., Webley, D. M. & Bacon, J. S. D.) 104P
Bacteriochlorophyll, biosynthesis of, by *Rhodopseudomonas capsulata* (Cooper, R.) 100
Bacteriophages T2 and T4, effects of alkylating agents on (Brookes, P. & Lawley, P. D.) 138
Barbiturates, inhibitory action of, on D-glucuronolactone dehydrogenase (Marsh, C. A.) 108
Beet root, 'compartmentation' of acids in (MacLennan, D. H., Beevers, H. & Harley, J. L.) 316
Bile salts, conjugated, solvent properties of dilute micellar solutions of, and fat absorption (Hofmann, A. F.) 57
Bile salts, effect of, on oxidation of cholesterol by liver mitochondria (Lee, M. J. & Whitehouse, M. W.) 189
Biotin, factors affecting biosynthesis of, by a pseudomonad (Rose, A. H. & Ilahi, M.) 96P
Biotin, nature of binding site of avidin for (Green, N. M.) 599
[^{14}C]Biotin, use of, for kinetic studies and assay of avidin (Green, N. M.) 585
Bis-γ-L-glutamyl-L-cystinyl-bis-β-alanine from etiolated seedlings of *Phaseolus aureus* (Carnegie, P. R.) 471
Blood, comparative physiology of transfer of substances between nervous system and (Treherne, J. E.) 108P
Blood plasma, human, isolation from, of a substance having positive inotropic action on isolated toad heart (Curtain, C. C. & Nayler, W. G.) 69
Blood, uptake of triglyceride fatty acids of chylomicra and low-density lipoproteins from, by goat mammary gland (Barry, J. M., Bartley, W., Linzell, J. L. & Robinson, D. S.) 6
Body spaces in healthy East Africans (Blackman, V. & Leonard, P. J.) 71P
Bone, cortical, bovine, mucosubstances of (Herring, G. M. & Kent, P. W.) 405
Bone, distribution of organically bound sulphate in cartilage and, during calcification (Weatherell, J. A. & Weidmann, S. M.) 265
Brain, effects of potassium and sodium on respiration of slices of (Hertz, L. & Clausen, T.) 526
Brain extracts, chromatographic behaviour of the acetylcholine activity of (McLennan, H., Curry, L. & Walker, R.) 163
Brain, fluoroacetate and metabolism of ammonia in (Lahiri, S. & Quastel, J. H.) 157
Brain, ox, properties and function of adenosine triphosphate–creatine phosphotransferase from (Wood, T.) 210
Brain, subcellular distribution and properties of neutral and acid proteinases in (Marks, N. & Lajtha, A.) 438
Bryophyllum leaves, 'compartmentation' of acids in (MacLennan, D. H., Beevers, H. & Harley, J. L.) 316

Calcification, distribution of organically bound sulphate in bone and cartilage during (Weatherell, J. A. & Weidmann, S. M.) 265
Carbohydrases of *Polyplastron multivesiculatum* (Abou Akkada, A. R., Eadie, J. M. & Howard, B. H.) 268
Carbohydrates, metabolism of, by rumen Protozoa (Howard, B. H.) 89P
Carbohydrates, protozoal, structure and metabolism of (Manners, D. J. & Ryley, J. F.) 88P
Carboxyltransferase and glutamate-dehydrogenase activities in heart (Hülsmann, W. C.) 49P
Carnitine, possible function of, in carbohydrate sparing of fatty acid oxidation (Bremer, J.) 25P
Carrot root, 'compartmentation' of acids in (MacLennan, D. H., Beevers, H. & Harley, J. L.) 316
Cartilage, distribution of organically bound sulphate in bone and, during calcification (Weatherell, J. A. & Weidmann, S. M.) 265
Catecholamine-induced changes, effects of prostaglandins on, in free fatty acids of plasma in dog (Bergström, S., Carlson, L. A. & Orö, L.) 27P
Cell surface, sponge, in relation to aggregation specificity (MacLennan, A. P.) 99P
Cells (strain HLM), human, utilization of [^{14}C]glucose by, in tissue culture (Crockett, R. L. & Leslie, I.) 516
Cephalopods, phosphatases and nucleases in (Farina, B. & Leone, E.) 7P
Cephalosporin compounds, formation of metabolites from (O'Callaghan, C. H. & Muggleton, P. W.) 304
Chick embryo, intracellular distribution of isocitrate–nicotinamide–adenine dinucleotide phosphate-oxidoreductase activity during development of (Baker, W. W. & Newburgh, R. W.) 510
Chlorella vulgaris, fermentation of glucose by (Syrett, P. J. & Wong, H.-A.) 308
Chlorocruorins of annelids, high-molecular-weight, electron-microscope studies of (Roche, J.) 108P
2-Chloroethyl 2-hydroxyethyl sulphide, effect of, on T2 and T4 bacteriophages (Brookes, P. & Lawley, P. D.) 138
Chloroplast grana and ferredoxin from *Cucurbita pepo*, reduction of nitrite and hydroxylamine by (Hewitt, E. J. & Betts, G. F.) 20P
Cholesterol, distribution of, in paper-electrophoretogram fractions of serum (Genetet, F., Meyer, N. & Wolff, R.) 21P
Cholesterol, effect of bile salts and bile-salt analogues on oxidation of, by liver mitochondria (Lee, M. J. & Whitehouse, M. W.) 189
N-Choloyl-β-alanine, effect of, on oxidation of cholesterol by liver mitochondria (Lee, M. J. & Whitehouse, M. W.) 189
N-Choloylaminomethanesulphonic acid, effect of, on oxidation of cholesterol by liver mitochondria (Lee, M. J. & Whitehouse, M. W.) 189
Chondroitin sulphate, extraction of, from bovine cortical bone (Herring, G. M. & Kent, P. W.) 405
Chylomicra, uptake of triglyceride fatty acids of, from blood, by goat mammary gland (Barry, J. M., Bartley, W., Linzell, J. L. & Robinson, D. S.) 6

Chymotrypsin, action of, on human α-lipoprotein (Ashworth, L. A. E. & Green, C.) 561
Chymotrypsinogen A, disulphide bridges of (Brown, J. R. & Hartley, B. S.) 59P
Circulation, peripheral, in vervet monkey (Wright, P. G.) 85P
Citrate cleavage and fatty acid synthesis, relation between rates of, in rat liver preparations (Kornacker, M. & Lowenstein, J. M.) 27P
'Clover stone', two constituents of (Nottle, M. C. & Pope, G. S.) 67P
Cobamide coenzyme, biosynthesis of (Weissbach, H., Redfield, B. & Peterkofsky, A.) 4P
Cocaine, role of magnesium-binding sites in inhibition of mitochondrial oxidations by (Tyler, D. D.) 17P
Coenzyme A, fatty acyl thio esters of (Tubbs, P. K. & Garland, P. B.) 25P
Collagen, formation and breakdown of, in human uterus during pregnancy and post-partum involution (Woessner, J. F., jun. & Brewer, T. H.) 75
Collagen of rat, effect of age on (Kulonen, E., Mikkonen, L. & Heikkinen, E.) 63P
Collagen, salt-soluble, in extracts of uterus muscle and in foetal metamyosin (Needham, D. M. & Williams, J. M.) 546
Collagen, thermally reconstituted, effect of salts and amino acids on (Candlish, J. K. & Tristram, G. R.) 97P
'Compartmentation' of acids in plant tissues (MacLennan, D. H., Beevers, H. & Harley, J. L.) 316
Coproporphyrinogen, biosynthesis of, by *Rhodopseudomonas capsulata* (Cooper, R.) 100
Corticosteroid-like substances in urinary steroids of cats (Borrell, S.) 54
Cortisol, binding of, in serum in kwashiorkor (Leonard, P. J. & MacWilliam, K. M.) 77P
Crab mitochondria, relationship between endogenous ubiquinone and respiratory chain of (Burrin, D. H. & Beechey, R. B.) 111P
Crotonyl-coenzyme A, carboxylation of, by mammalian enzyme systems (Tustanoff, E. R. & Stern, J. R.) 56P
Crustacyanin, purification and properties of (Zagalsky, P. F. & Cheesman, D. F.) 21P
Cucurbita pepo, reduction of nitrite and hydroxylamine by ferredoxin and chloroplast grana from (Hewitt, E. J. & Betts, G. F.) 20P
Cyclopenol from *Penicillium viridicatum* and *P. cyclopium* (Birkinshaw, J. H., Luckner, M., Mohammed, Y. S., Mothes, K. & Stickings, C. E.) 196
Cymbopogon citratus, nature of major constituent of wax from leaves of (Crawford, M. A. & Menezes, F. A.) 72P
Cystathioninuria in neuroblastoma (Gjessing, L. R.) 42P
Cytochrome *c*-551, *Pseudomonas*, amino acid sequence of (Ambler, R. P.) 349
Cytochrome *c*-551, *Pseudomonas*, purification and amino acid composition of (Ambler, R. P.) 341
Cytochrome *c*-551, *Pseudomonas*, structure of chymotryptic peptide from (Gray, W. R. & Hartley, B. S.) 379
Cytoskeleton, evidence for, and for its cement in muscle (McCollester, D. L.) 66P

N-Deoxycholoyl-β-alanine, effect of, on oxidation of cholesterol by liver mitochondria (Lee, M. J. & Whitehouse, M. W.) 189
N-Deoxycholoylaminomethanesulphonic acid, effect of, on oxidation of cholesterol by liver mitochondria (Lee, M. J. & Whitehouse, M. W.) 189
Deoxyribonucleic acid nucleotidyltransferase activities from calf-thymus gland nuclei and cytoplasm (Keir, H. M., Shepherd, J. B. & Hay, J.) 9P
Deoxyribonucleic acid nucleotidyltransferase, mammalian, inhibition of, by actinomycin D (Keir, H. M., Omura, H. & Shepherd, J. B.) 425
Deoxyribonucleic acid, replication of in *Escherichia coli* (Baldwin, R. L. & Shooter, E. M.) 9P
Deoxyribonucleic acid, studies of nucleotide sequences in (Petersen, G. B.) 1P
Deoxyribonucleic acid, tautomerism and nature of hydrogen-bonding in (Ulbricht, T. L. V.) 6P
Dextran, solubility of proteins in the presence of (Laurent, T. C.) 253
Dimethylnitrosamine, reaction of, with nucleic acids *in vivo* (Craddock, V. M. & Magee, P. N.) 32
Dinitrophenyl-chondropeptide from bovine trachea, degradation of (Kent, P. W. & Stevenson, F. K.) 114P
Dolichol, liver, pig, origin of (Butterworth, P. H. W., Draper, H. H., Hemming, F. W., Pennock, J. F. & Morton, R. A.) 32P

Ehrlich ascites-carcinoma cells, polystyrene-particle uptake by (Roberts, J. & Quastel, J. H.) 150
Ehrlich ascites-tumour cells, inhibition of inosine 5′-phosphate dehydrogenase from, by 6-thioinosine 5′-phosphate (Atkinson, M. R., Morton, R. K. & Murray, A. W.) 167
Elastin, formation and breakdown of, in human uterus during pregnancy and post-partum involution (Woessner, J. F., jun. & Brewer, T. H.) 75
Embryo, chick, intracellular distribution of isocitrate–nicotinamide–adenine dinucleotide phosphate-oxidoreductase activity during development of (Baker, W. W. & Newburgh, R. W.) 510
Entodinium caudatum, molecular structure of reserve polysaccharide from (Eadie, J. M., Manners, D. J. & Stark, J. R.) 91P
Enzymes, action of, on human α-lipoprotein (Ashworth, L. A. E. & Green, C.) 561
Enzymes, leakage of, from human- and rat-liver slices (McLean, A. E. M.) 54P
Equilibria, effects of, on countercurrent distributions of phospholipids (Collins, F. D.) 177
Erythrocytes from normal and acatalatic humans, properties of (Aebi, H., Heiniger, J. P. & Suter, H.) 63P
Escherichia coli, conversion of shikimic acid into anthranilic acid and phenylpyruvic acids by cell-free extracts of (Morgan, P. N., Gibson, M. I. & Gibson, F.) 229
Escherichia coli, replication of deoxyribonucleic acid in (Baldwin, R. L. & Shooter, E. M.) 9P
Escherichia coli, specific metabolic repression of three induced enzymes in (McFall, E. & Mandelstam, J.) 391
Ethyl methanesulphonate, effect of, on T2 and T4 bacteriophages (Brookes, P. & Lawley, P. D.) 138

Factor V, isolation of, from bovine plasma (Esnouf, M. P., Jobin, F. & Peden, J. C.) 44P
Fat absorption and solvent properties of dilute micellar solutions of conjugated bile salts (Hofmann, A. F.) 57
Fatty acid composition of major phospholipids and neutral lipids, use of thin-layer chromatography and gas–liquid chromatography in determination of (Bowyer, D. E., Leat, W. M. F., Howard, A. N. & Gresham, G. A) 24P
Fatty acid composition of the serum lipids of pigs given different amounts of linoleic acid (Leat, W. M. F.) 44
Fatty acid oxidation, possible function of carnitine in carbohydrate sparing of (Bremer, J.) 25P
Fatty acid synthesis and citrate cleavage, relation between rates of, in rat liver preparations (Kornacker, M. & Lowenstein, J. M.) 27P
Fatty acids, biosynthesis of, in extracts of lactating-rabbit mammary gland (Smith, S. & Dils, R.) 30P
Fatty acids, individual, influence of, on oxidation and incorporation of uniformly labelled glucose into muscular tissue *in vitro* (Bühring, H.) 32P
Fatty acids of different tissue lipids in rats fed on diets qualitatively different in lipid composition (Turchetto, E., Proja, M. & Gandolfi, M. G.) 22P

Fatty acids, triglyceride, of chylomicra and low-density lipoproteins, uptake of, from blood, by goat mammary gland (Barry, J. M., Bartley, W., Linzell, J. L. & Robinson, D. S.) 6
Fatty acids, unsaturated, breakdown of, by plant tissue (Hitchcock, C. & James, A. T.) 22P
Fatty acyl-coenzyme A, long-chain, concentration in rat heart and liver (Garland, P. B. & Tubbs, P. K.) 25P
Ferredoxin and chloroplast grana from *Cucurbita pepo*, reduction of nitrite and hydroxylamine by (Hewitt, E. J. & Betts, G. F.) 20P
Ferricytochrome b_3 and ferrocytochrome b_2, preparation of crystalline forms of, from yeast (Morton, R. K. & Shepley, K.) 257
Ferrocytochrome b_3 and ferricytochrome b_2, preparation of crystalline forms of, from yeast (Morton, R. K. & Shepley, K.) 257
Fibrinogen, measurement of rates of synthesis of (McFarlane, A. S.) 277
Fibrinogen, tyrosine *O*-sulphate in fibrin and (Jevons, F. R.) 621
Fishes, amino acids and related compounds in (Cowey, C. B.) 107P
Fluoroacetate and metabolism of ammonia in brain (Lahiri, S. & Quastel, J. H.) 157
Formiminoglutamic acid, excretion of imidazolylacrylic acid and, in kwashiorkor and megaloblastic anaemia (Whitehead, R. G. & Allen, D. M.) 84P
Formyl-coenzyme A, decarboxylation of oxalyl-coenzyme A to, by *Pseudomonas oxalaticus* (OX1) (Quayle, J. R.) 492
D-Fructofuranose 2-phosphate, synthesis of (Pontis, H. G. & Fischer, C. L.) 452
D-Fructopyranose 2-phosphate, synthesis of (Pontis, H. G. & Fischer, C. L.) 452
Fructose 1,6-diphosphatase of rat liver, properties of (Newsholme, E. A.) 38P

β-Galactosidase, metabolic repression of (McFall, E. & Mandelstam, J.) 391
Galactosides, naturally occurring, hydrolysis of, by rumen Protozoa (Howard, B. H.) 90P
Galago senegalensis, factors involved in jump of (Hall-Craggs, E. C. B.) 76P
Galagos, vision in (Luck, C. P.) 78P
Gangliosides in cerebral tissues and dispersions, effect of anoxia on (Booth, D. A.) 112P
Genetics, ecological, of natural populations (Owen, D. F.) 81P
γ-Globulins, human, normal and pathological, properties of peptide chains of (Cohen, S.) 334
Glucamylase, activity of, in extracts of rat intestinal mucosa (Dahlqvist, A. & Thomson, D. L.) 272
Gluconeogenesis by kidney cortex of various species (Krebs, H. A. & Yoshida, T.) 398
Glucose acetamidomannuronic acid polymer of *Micrococcus lysodeikticus* cell walls, structures present in (Perkins, H. R.) 104P
Glucose, fermentation of, by *Chlorella vulgaris* (Syrett, P. J. & Wong, H.-A.) 308
Glucose metabolism and nicotinamide nucleotide coenzymes in livers of foetal and newborn lambs (Filsell, O. H., Jarrett, I. G., Atkinson, M. R., Caiger, P. & Morton, R. K.) 92
Glucose oxidase, comparison of oxidation of sugars catalysed by, and reduction of the enzyme by dithionite (Swoboda, B. E. P., Massey, V., Gibson, Q. H. & Atherton, N. M.) 37P
'Glucose 6-phosphate-dehydrogenase' activity and thiol content of thymus nuclei from control and X-irradiated rats (Deakin, H., Ord, M. G. & Stocken, L. A.) 296
[^{14}C]Glucose, utilization of, by human cells (strain HLM) in tissue culture (Crockett, R. L. & Leslie, I.) 516
α-(1→3)-Glucosidic linkages, hydrolysis of, by plant enzymes (Hutson, D. H. & Manners, D. J.) 91P
α-(1→3)-Glucosidic linkages, possible presence of, in starch-type polysaccharides (Manners, D. J. & Mercer, G. A.) 34P
β-Glucuronidase, urinary inhibitors of (Fripp, P. J.) 75P
β-Glucuronidase, urinary, origin of, in vervet monkey (*Cercopithecus* sp.) (Fripp, P. J.) 74P
D-Glucuronolactone dehydrogenase of rat liver, properties of (Marsh, C. A.) 108
Glutamate-dehydrogenase and carboxyltransferase activities in heart (Hülsmann, W. C.) 49P
Glutamate metabolism, control of, in brain and liver mitochondrial systems (Balázs, R.) 44P
Glutamate oxidation at mitochondrial level, biochemical control of (Papa, S., Saccone, C., Palmieri, F., Francavilla, A. & Quagliariello, E.) 54P
Glutathione, mechanism of synthesis of, in human red blood cell (Hořejší, J.) 63P
Glyceraldehyde 3-phosphate dehydrogenase, nicotinamide–adenine dinucleotide compounds formed by the action of (Hilvers, A. G. & van Dam, K.) 49P
Glyceraldehyde 3-phosphate dehydrogenases (Harris, J. I. & Perham, R. N.) 60P
β-Glycerophosphatase, alkaline, of rabbit small intestine, metal-ion activation of (Clark, B. & Porteous, J. W.) 100P
Glycine, uptake of, by ascites cells pretreated with azaserine and 6-thioguanine (Adams, D. H.) 240
Glycogen, fixed, absence of, in some muscle samples from patients with progressive muscular dystrophy (Kits van Heijningen, A. J. M.) 40P
Glycollate oxidase of pig liver (Dickinson, F. M. & Massey, V.) 53P
Glyconeogenesis in Protozoa (Hogg, J. F.) 88P
Glycosidases, synthesis of aldono-(1→5)-lactones and their inhibitory properties towards (Conchie, J., Hay, A. J. & Levvy, G. A.) 103P
Growth hormone of high specific radioactivity, human, ^{131}I-labelled, preparation of (Greenwood, F. C., Hunter, W. M. & Glover, J. S.) 114
Growth hormone, polysomes and messenger ribonucleic acid (Korner, A.) 14P
Guanidine hydrochloride, dissociation of avidin into subunits by (Green, N. M.) 609
Guanidine phosphotransferases, comparative survey of (Virden, R. & Watts, D. C.) 109P
Guanine, uptake of, by ascites cells pretreated with azaserine and 6-thioguanine (Adams, D. H.) 240

Haemin, nitrate reductase in cell-free extracts of *Staphylococcus aureus* strain requiring (Chang, J. P. & Lascelles, J.) 503
Haemoglobin, extramolecular interaction of oxygenation of (Torelli, G., Pini, A., Fontana, A. & Gnoni, G.) 61P
Haemoglobin, intramolecular interaction among oxygenation reactions of (Torelli, G. & Pini, A.) 61P
Haemoglobin, possibility of statistical discrimination of equilibrium constants of four oxygenation reactions of (Torelli, G. & Pini, A.) 60P
Haemoglobins of annelids, high-molecular-weight, electron-microscope studies of (Roche, J.) 108P
Heart muscle, effect of pH on metabolism of [1-^{14}C]pyruvate by (Opie, L. H. & Muller, M. A.) 81P
Heart muscle, rat, isolation of ribosomes and polysomes from (Earl, D. C. N. & Korner, A.) 15P
Heart, rat, insulin and incorporation of amino acids into protein of (Manchester, K. L. & Wool, I. G.) 202
Heart, toad, isolated, isolation from human blood plasma of substance having positive inotropic action on (Curtain, C. C. & Nayler, W. G.) 69

Hevea brasiliensis, incorporation of mevalonate and isopentenyl pyrophosphate into rubber by latex fractions of (Archer, B. L., Audley, B. G., Cockbain, E. G. & McSweeney, G. P.) 565
Hexokinase, yeast, adenosine-triphosphatase activity of (de la Fuente, G. & Sols, A.) 36P
Homoglutathione, isolation of, from seedlings of *Phaseolus aureus* (Carnegie, P. R.) 459
Homoglutathione, structure and properties of (Carnegie, P. R.) 471
Homo-γ-linolenic acid, enzymic conversion of γ-linolenic acid into (Nugteren, D. H.) 28P
Housefly, phospholipids of (Crone, H. D. & Bridges, R. G.) 11
Hyaluronic acid, osmotic pressure of mixtures of serum albumin and (Laurent, T. C. & Ogston, A. G.) 249
3-Hydroxyanthranilic acid, effect of, on nicotinamide–adenine dinucleotide-linked mitochondrial systems (Quagliariello, E., Papa, S., Alifano, A. & Budillon, G.) 56P
Hydroxylamine, phosphorylation coupled to oxidation of, in particles from *Nitrosomonas europaea* (Ramaiah, A. & Nicholas, D. J. D.) 19P

Imidazolylacrylic acid and formiminoglutamic acid, excretion of, in kwashiorkor and megaloblastic anaemia (Whitehead, R. G. & Allen, D. M.) 84P
Indolylacetic acid, comparative studies on conjugation of, in primates and lower animals (Patel, R. Z. & Crawford, M. A.) 81P
Indolylacrylylglycine, identification and occurrence of, in urine of East Africans (Banwell, J. & Crawford, M. A.) 69P
Inosine 5′-phosphate dehydrogenase from Ehrlich ascites-tumour cells, inhibition of, by 6-thioinosine 5′-phosphate (Atkinson, M. R., Morton, R. K. & Murray, A. W.) 167
*meso*Inositol, formation of (+)-pinitol, *dextro*inositol and sequoyitol from, in leaves of *Trifolium incarnatum* (Scholda, R., Billek, G. & Hoffmann-Ostenhof, O.) 31P
*myo*Inositol pentaphosphates, isolation of, from hydrolysates of phytic acid (Cosgrove, D. J.) 172
Inotropic action, positive, on the isolated toad heart, isolation from human blood plasma of a substance with (Curtain, C. C. & Nayler, W. G.) 69
Insecticides, organic, comparative metabolism and toxicology of (Winteringham, F. P. W.) 109P
Insulin and incorporation of amino acids into protein of rat heart (Manchester, K. L. & Wool, I. G.) 202
Insulin, effect of human plasma albumin on action of, in isolated rat diaphram (Jervell, J.) 31P
Insulin, incorporation of tritium-labelled amino acids into, in ox pancreas *in vitro* (Taylor, K. W. & Parry, D. G.) 94P
Intestinal mucosa, rat, separation and characterization of two amylases from extracts of (Dahlqvist, A. & Thomson, D. L.) 272
Invertase, intestinal, rat (Carnie, J. A. & Porteous, J. W.) 100P
Invertebrates, euryhaline, effectors and mechanisms of intracellular iso-osmotic regulation in (Florkin, M.) 107P
Involution, post-partum, formation and breakdown of collagen and elastin in human uterus during (Woessner, J. F., jun. & Brewer, T. H.) 75
Iodine isotope (^{131}I), incorporation of, into iodothyronines of rat thyroid gland (Plaskett, L. G., Barnaby, C. F. & Lloyd, G. I.) 479
Iodine isotope (^{131}I), preparation of human growth hormone labelled with (Greenwood, F. C., Hunter, W. M. & Glover, J. S.) 114
Iodoacetamide, inhibition of L-arginine–adenosine triphosphate phosphotransferases by (Ruiz Cruz, J., Virden, R. & Watts, D. C.) 110P
Iodothyronines, incorporation of ^{131}I into, in rat thyroid gland (Plaskett, L. G., Barnaby, C. F. & Lloyd, G. I.) 479
Iron chelates, distribution of, in rats (Nagarajan, B., Sivaramakrishnan, V. M. & Brahmanandam, S.) 66P
Iron, relationship between activity of plant aconitase and (Palmer, M. J.) 98P
Isocitrate dehydrogenase, inhibition of, by oxalomalate (Ruffo, A. & Adinolfi, A.) 50P
Isocitrate–nicotinamide–adenine dinucleotide phosphate-oxidoreductase activity, intracellular distribution of, during development of chick embryo (Baker, W. W. & Newburgh, R. W.) 510
Isoniazid and its metabolites, conjugation of, with glycine (Chalmers, J. G.) 41P
Iso-osmotic regulation in euryhaline invertebrates, intracellular, effectors and mechanisms of (Florkin, M.) 107P
Isopentenyl pyrophosphate, incorporation of mevalonate and, into rubber by *Hevea brasiliensis*-latex fractions (Archer, B. L., Audley, B. G., Cockbain, E. G. & McSweeney, G. P.) 565

Keilin, David (1887–1963): obituary notice of (Hartree, E. F.) 1
Kidney, baboon, oxygen–citrate–glucose extraction by (Baker, B. A., Mwasi, L. & Crawford, M. A.) 69P
Kidney cortex of various species, gluconeogenesis by (Krebs, H. A. & Yoshida, T.) 398
Kidney, effects of potassium and sodium on respiration of slices of (Hertz, L. & Clausen, T.) 526
Kidney, metabolism and transport of Krebs-cycle acids in (Crawford, M. A., Nguli, K. & Crawford, S. M.) 73P
Kidney, methylation of nucleic acids of, with dimethylnitrosamine *in vivo* (Craddock, V. M. & Magee, P. N.) 32
Kidney of diabetic rat, metabolism in (Stafford, W. L. & Mahler, R. F.) 36P
King, Earl Judson (1901–1962): obituary notice of (Neuberger, A. & Klyne, W.) 401
Krebs-cycle acids, metabolism and transport of, in kidney (Crawford, M. A., Nguli, K. & Crawford, S. M.) 73P
Kwashiorkor, binding of cortisol in serum in (Leonard, P. J. & MacWilliam, K. M.) 77P
Kwashiorkor, imbalance of serum amino acids in children with (Whitehead, R. G.) 84P

Lactate-dehydrogenase activities on human-tissue extracts, effect of carboxymethyl- and diethylaminoethyl-cellulose on (Withycombe, W. A. & Wilkinson, J. H.) 48P
Lactate dehydrogenase, effect of urea on activities of (Plummer, D. T., Wilkinson, J. H. & Withycombe, W. A.) 48P
Lactation, plasma lipids of cow during (Duncan, W. R. H. & Garton, G. A.) 414
Latex fractions, *Hevea brasiliensis*, incorporation of mevalonate and isopentenyl pyrophosphate into rubber by (Archer, B. L., Audley, B. G., Cockbain, E. G. & McSweeney, G. P.) 565
Lecithin, anomalous countercurrent distributions of (Collins, F. D.) 177
Leucocytes, polymorphonuclear, polystyrene-particle uptake by (Roberts, J. & Quastel, J. H.) 150
Linoleic acid, fatty acid composition of serum lipids of pigs given different amounts of (Leat, W. M. F.) 44
γ-Linolenic acid, enzymic conversion of, into homo-γ-linolenic acid (Nugteren, D. H.) 28P
Lipid extraction, application of Bligh & Dyer method of, to tissue homogenates (Hanson, S. W. F. & Olley, J.) 101P
Lipid recovery from tissue homogenates, apparent losses in (Hanson, S. W. F. & Olley, J.) 102P
Lipids of arterial wall, bound, histochemical study of (Maggi, V. & Brander, W.) 28P
Lipids of cow plasma during pregnancy and lactation (Duncan, W. R. H. & Garton, G. A.) 414

Lipids, serum, of pigs given different amounts of linoleic acid, fatty acid composition of (Leat, W. M. F.) 44
Lipids, transport of, in serum of East Africans (Jones, K. W. & Leonard, P. J.) 76P
Lipoic acid, binding of, by avidin (Green, N. M.) 599
α-Lipoprotein, human, action of enzymes on (Ashworth, L. A. E. & Green, C.) 561
Lipoproteins, low-density, uptake of triglyceride fatty acids of, from blood, by goat mammary gland (Barry, J. M., Bartley, W., Linzell, J. L. & Robinson, D. S.) 6
Lipoyl dehydrogenase from *Saccharomyces cerevisiae* (Wren, A. & Massey, V.) 47P
Lithium, absorption and excretion of, in sheep (Harrison, F. A., Hill, K. J. & Mangan, J. L.) 99P
Liver, measurement of synthesis rates of plasma proteins produced by (McFarlane, A. S.) 277
Liver, methylation of nucleic acids of, with dimethylnitrosamine *in vivo* (Craddock, V. M. & Magee, P. N.) 32
Liver, ox, purification of arginase from (Bach, S. J., Hawkins, R. A. & Swaine, D.) 263
Liver, rat, properties of D-glucuronolactone of (Marsh, C. A.) 108
Livers of foetal and newborn lambs, nicotinamide nucleotide coenzymes and glucose metabolism in (Filsell, O. H., Jarrett, I. G., Atkinson, M. R., Caiger, P. & Morton, R. K.) 92
Lysine, uptake of, by ascites cells pretreated with azaserine and 6-thioguanine (Adams, D. H.) 240
Lysolecithin, anomalous countercurrent distributions of (Collins, F. D.) 177
Lysosomes, muscular dystrophy and tissue damage (Shibko, S. & Tappel, A. L.) 33P
Lysozyme, separation of, during isolation of avidin (Melamed, M. D. & Green, N. M.) 591

Magnesium, absorption and excretion of, in sheep (Harrison, F. A., Hill, K. J. & Mangan, J. L.) 99P
Magnesium-binding sites, role of, in inhibition of mitochondrial oxidations by cocaine (Tyler, D. D.) 17P
Magnesium 2,4-divinylphaeoporphyrin a_5 monomethyl ester, a protochlorophyll-like pigment produced by *Rhodopseudomonas spheroides* (Jones, O. T. G.) 182
Magnesium protoporphyrin monomethyl ester, biosynthesis of, by *Rhodopseudomonas capsulata* (Cooper, R.) 100
Maize tissues, 'compartmentation' of acids in (MacLennan, D. H., Beevers, H. & Harley, J. L.) 316
L-Malate, oxidation of, by *Pseudomonas* sp. (Francis, M. J. O., Hughes, D. E., Kornberg, H. L. & Phizackerley, P. J. R.) 430
Mammary gland, goat, uptake from blood of triglyceride fatty acids of chylomicra and low-density lipoproteins by (Barry, J. M., Bartley, W., Linzell, J. L. & Robinson, D. S.) 6
Manganese ions, inhibition of adenosine 5′-triphosphate–creatine phosphotransferase by (Watts, D. C.) 220
Mannonolactone, inhibition of mannosidases by (Levvy, G. A., Hay, A. J. & Conchie, J.) 102P
Mannosidases, inhibition of, by mannonolactone (Levvy, G. A., Hay, A. J. & Conchie, J.) 102P
Metal ion-binding with human transferrin (Perkins, D. J.) 93P
Metamyosin, foetal, salt-soluble collagen in (Needham, D. M. & Williams, J. M.) 546
Methionine, transfer of methyl group of, to nucleolar ribonucleic acid (Sirlin, J. L., Jacob, J. & Tandler, C. J.) 447
Methionine, vitamin B_{12} in the synthesis of (Woods, D. D.) 4P
Methyl group of methionine, transfer of, to nucleolar ribonucleic acid (Sirlin, J. L., Jacob, J. & Tandler, C. J.) 447
Methyl methanesulphonate, effect of, on T2 and T4 bacteriophages (Brookes, P. & Lawley, P. D.) 138
α-Methylaspartate, effects of, on protective action by amino acids in ammonia poisoning (Salvatore, F., Cittadini, D., Cimino, F. & D'Ajello-Caracciolo, M.) 43P
4-Methylpentanoyltaurine, effect of, on oxidation of cholesterol by liver mitochondria (Lee, M. J. & Whitehouse, M. W.) 189
Mevalonate, incorporation of isopentenyl pyrophosphate and, into rubber by *Hevea brasiliensis*-latex fractions (Archer, B. L., Audley, B. G., Cockbain, E. G. & McSweeney, G. P.) 565
Mevalonic acid derivatives, utilization of, by rat-liver microsomes in the absence of nicotinamide–adenine nucleotides (Gosselin, L.) 23P
Mevalonic acid, investigation of lipid formed by lactobacilli from (Thorne, K. J. I. & Kodicek, E.) 24P
Micrococcus lysodeikticus cell walls, structures present in glucose acetamidomannuronic acid polymer of (Perkins, H. R.) 104P
Micro-organisms, occurrence of, in tropical swamps (Visser, S. A.) 83P
Microsomes, liver, effect of polyuridylic acid on incorporation of phenylalanine by subfractions of (Campbell, P. N. & Cooper, C.) 94P
Mitochondria, crab, relationship between endogenous ubiquinone and respiratory chains of (Burrin, D. H. & Beechey, R. B.) 111P
Mitochondria, excess of vitamin A and swelling of (Lucy, J. A., Luscombe, M. & Dingle, J. T.) 419
Mitochondria, liver, effect of bile salts and bile-salt analogues on oxidation of cholesterol by (Lee, M. J. & Whitehouse, M. W.) 189
Monosaccharides from hydrolyses of oat-coleoptile cell walls (Ray, P. M.) 144
Mucosubstances of bovine cortical bone (Herring, G. M. & Kent, P. W.) 405
Mucosubstances, sensitivity of neuraminosidic linkage in, towards acid and towards neuraminidase (Gibbons, R. A.) 380
Musca domestica, *see* Housefly
Muscle, effects of potassium and sodium on respiration of slices of (Hertz, L. & Clausen, T.) 526
Mustard gas, effect of, on T2 and T4 bacteriophages (Brookes, P. & Lawley, P. D.) 138

'Nairobi eye' beetle (*Paederus sabaeus* Er.), recent outbreaks of, in Uganda (McCrae, A. W. R. & Visser, S. A.) 79P
Nervous system, comparative physiology of transfer of substances between blood and (Treherne, J. E.) 108P
Neuraminic acids, hydrolysis of (Gibbons, R. A.) 380
Neuraminidase, sensitivity of neuraminosidic linkage in mucosubstances to (Gibbons, R. A.) 380
Nicotinamide–adenine dinucleotide compounds formed by action of glyceraldehyde 3-phosphate dehydrogenase (Hilvers, A. G. & van Dam, K.) 49P
Nicotinamide nucleotide coenzymes and glucose metabolism in livers of foetal and newborn lambs (Filsell, O. H., Jarrett, I. G., Atkinson, M. R., Caiger, P. & Morton, R. K.) 92
Nicotinic acid and related compounds, effects of ultraviolet radiation on (Abelson, D. & Boyle, A.) 19P
Nitrate reductase in cell-free extracts of a haemin-requiring strain of *Staphylococcus aureus* (Chang, J. P. & Lascelles, J.) 503
p-Nitrophenyl acetate, inhibition of adenosine 5′-triphosphate–creatine phosphotransferase by (Watts, D. C.) 220
Nitrosomonas europaea, phosphorylation coupled to oxidation of hydroxylamine in particles from (Ramaiah, A. & Nicholas, D. J. D.) 19P
Novobiocin, effect of, on membrane synthesis by protoplasts of *Bacillus megaterium* (Yudkin, M. D.) 290

Nucleases and phosphatases in cephalopods (Farina, B. & Leone, E.) 7P
Nuclei from rat thymus gland, effect of X-irradiation on activation of amino acids in (Smit, J. A. & Stocken, L. A.) 37
Nuclei, liver, depolymerization of ribonucleic acid by enzymes in basic proteins from liver ribosomes and (Martin, S. J., England, H., Turkington, V. & Leslie, I.) 327
Nuclei, liver, rat, isolation and enzyme activity of (Widnell, C. C.) 11P
Nucleic acid and protein synthesis in Protozoa (Newton, B. A.) 87P
Nucleic acids and their constituent nucleotides, alkylation of (Lawley, P. D. & Brookes, P.) 127
Nucleic acids obtained from viruses, chemical relationships between (Markham, R.) 2P
Nucleic acids, reaction of dimethylnitrosamine with, *in vivo* (Craddock, V. M. & Magee, P. N.) 32
Nucleoproteins of mammalian tumour-cell nuclei in protein and nucleic acid biosynthesis (Burdon, R. H., Wykes, J. R. & Wilkie, N. M.) 8P
Nucleotides, constituent, alkylation of nucleic acids and (Lawley, P. D. & Brookes, P.) 127

Oat-coleoptile cell walls, sugar composition of (Ray, P. M.) 144
Obituary notice of: David Keilin (1887–1963) (Hartree, E. F.) 1
Obituary notice of: Earl Judson King (1901–1962) (Neuberger, A. & Klyne, W.) 401
Oestrogen, biosynthesis of, by rat ovaries (Oakey, R. E., Stitch, S. R. & Eccles, S. S.) 57P
Oligonucleotides from amino acid transfer ribonucleic acid, column chromatography of (Staehelin, M.) 2P
Onchocerca volvulus, development of, in *Simulium damnosum* and *S. neavei* (Barnley, G. R.) 70P
Onchocerciasis, biology of *Simulium* vectors of, in Uganda (McCrae, A. W. R. & Prentice, M. A.) 78P
Osmotic pressure of mixtures of serum albumin and hyaluronic acid (Laurent, T. C. & Ogston, A. G.) 249
Ovalbumin, frequency of errors in biosynthesis of, by hen oviduct (Loftfield, R. B.) 82
Oviduct, hen, frequency of errors in biosynthesis of ovalbumin by (Loftfield, R. B.) 82
Oxalyl-coenzyme A, decarboxylation of, by *Pseudomonas oxalaticus* (OX1) to formyl-coenzyme A (Quayle, J. R.) 492
α-Oxo acids, metabolism of, in plants (Milburn, T. R.) 80P
17-Oxo steroids, absence of, in urinary steroids of cats (Borrell, S.) 51
α-Oxoglutarate (plus ammonia), α-oxoglutarate and isocitrate as hydrogen donors for reduction of, in rat-liver mitochondria (Tager, J. M.) 55P
α-Oxoglutarate transaminases in rat kidney, subcellular distribution of, (Rowsell, E. V. & Turner, K. V.) 64P
α-Oxoglutarate transaminases in rat liver, subcellular distribution of (Rowsell, E. V., Turner, K. V. & Carnie, J. A.) 65P
Oxygen–citrate–glucose extraction and utilization by baboon kidney (Baker, B. A., Mwasi, L. & Crawford, M. A.) 69P

Palmitoyl-coenzyme A–carnitine palmitoyltransferase, assay method for (Norum, K. R.) 26P
Pasteur effect, feed-back control mechanisms involved in (Sols, A., de la Fuente, G., Viñuela, E. & Heredia, C. F.) 33P
Penicillin, effect of, on membrane synthesis by protoplasts of *Bacillus megaterium* (Yudkin, M. D.) 290
Penicillium cyclopium, cyclopenol and viridicatol from (Birkinshaw, J. H., Luckner, M., Mohammed, Y. S., Mothes, K. & Stickings, C. E.) 196
Penicillium viridicatum, viridicatol from (Birkinshaw, J. H., Luckner, M., Mohammed, Y. S., Mothes, K. & Stickings, C. E.) 196
Peptide chains of normal and pathological human γ-globulins, properties of (Cohen, S.) 334
Peptide, chymotryptic, from *Pseudomonas* cytochrome *c*-551 (Gray, W. R. & Hartley, B. S.) 379
Peptides, acidic, isolation of, from seedlings of *Phaseolus aureus* (Carnegie, P. R.) 459
Phaeoporphyrin, magnesium, production of, by *Rhodopseudomonas spheroides* (Jones, O. T. G.) 182
Phaseolus aureus, isolation of homoglutathione and acidic peptides from seedlings of (Carnegie, P. R.) 459
Phenylacetyl cephalosporin, formation of metabolites from (O'Callaghan, C. H. & Muggleton, P. W.) 304
Phenylalanine, effect of polyuridylic acid on incorporation of, by subfractions of liver microsomes (Campbell, P. N. & Cooper, C.) 94P
Phenylpyruvic acids, conversion of shikimic acid into, by cell-free extracts of *Aerobacter aerogenes* and *Escherichia coli* (Morgan, P. N., Gibson, M. I. & Gibson, F.) 229
Phosphagens, biological distribution of, among errant and sedentary Polychaeta (Thoai, N. V. & Robin, Y.) 109P
Phosphatase, alkaline, of human serum, isoenzymes of (Cunningham, V. R. & Rimer, J. G.) 50P
Phosphatases and nucleases in cephalopods (Farina, B. & Leone, E.) 7P
Phosphate, structurally bound, of possible significance in muscular contraction (Cheesman, D. F., Temperley, E. & Lagnado, J. R.) 38P
Phosphatidylethanolamine, anomalous countercurrent distributions of (Collins, F. D.) 177
Phosphodiesterase activity of semen (Libonati, M., Farina, B. & Leone, E.) 7P
2-Phospho-D-glyceric acid, simple preparation of (Tankó, B.) 40P
Phospholipase D, action of, on human lipoprotein (Ashworth, L. A. E. & Green, C.) 561
Phospholipids, anomalous countercurrent distributions of (Collins, F. D.) 177
Phospholipids of housefly (Crone, H. D. & Bridges, R. G.) 11
Phosphorylase activity in perfused rat heart, regulation of (Morgan, H. E. & Parmeggiani, A.) 39P
Phosphorylase phosphatase, purification and properties of (Fischer, E. H., Hurd, S. S., Novoa, W. B. & Krebs, E. G.) 39P
Phytic acid, isolation of *myo*inositol pentaphosphates from hydrolysates of (Cosgrove, D. J.) 172
Plant tissues, 'compartmentation' of acids in (MacLennan, D. H., Beevers, H. & Harley, J. L.) 316
Plants, widely spaced and grown in full daylight in equatorial climate, growth characteristics of (Huxley, P. A.) 76P
Plasma lipids, cow, during pregnancy and lactation (Duncan, W. R. H. & Garton, G. A.) 414
Polychaeta, errant and sedentary, biological distributions of phosphagens among (Thoai, N. V. & Robin, Y.) 109P
Polymorphonuclear leucocytes, polystyrene-particle uptake by (Roberts, J. & Quastel, J. H.) 150
Polyplastron multivesiculatum, carbohydrases of (Abou Akkada, A. R., Eadie, J. M. & Howard, B. H.) 268
Polyribonucleotides, stepwise degradation of (Brown, D. M.) 1P
Polysaccharide from *Entodinium caudatum*, reserve, molecular structure of (Eadie, J. M., Manners, D. J. & Stark, J. R.) 91P
Polysaccharide, plant, occurrence of apiose in fractions of (Bacon, J. S. D.) 103P
Polysaccharides, starch-type, observations on possible presence of α-(1→3)-glucosidic linkages in (Manners, D. J. & Mercer, G. A.) 34P

Polysomes and ribosomes, isolation of, from rat cardiac muscle (Earl, D. C. N. & Korner, A.) 15P
Polysomes, assay of, in particle preparations (Jackson, R. J., Munro, A. J. & Korner, A.) 11P
Polysomes, growth hormone and messenger ribonucleic acid (Korner, A.) 14P
Polystyrene particles, uptake of, by polymorphonuclear leucocytes and Ehrlich ascites-carcinoma cells (Roberts, J. & Quastel, J. H.) 150
Polyuridylic acid, activation of single ribosomes from ascites tumour cells by (White, A. M., Pedersen, S. & Hultin, T.) 12P
Polyuridylic acid, effect of, on the incorporation of phenylalanine by subfractions of liver microsomes (Campbell, P. N. & Cooper, C.) 94P
Potassium, effect of, on respiration of brain and muscle slices (Hertz, L. & Clausen, T.) 526
Pregnancy, formation and breakdown of collagen and elastin in human uterus during (Woessner, J. F., jun. & Brewer, T. H.) 75
Pregnancy, plasma lipids of cow during (Duncan, W. R. H. & Garton, G. A.) 414
Propionate metabolism in guinea-pig mammary-gland slices (Willmer, J. S. & Gutfreund, H.) 29P
Prostaglandins, effects of, on catecholamine-induced changes in free fatty acids of plasma in dog (Bergström, S., Carlson, L. A. & Orö, L.) 27P
Prostaglandins in human seminal plasma (Samuelsson, B.) 34P
Protein and nucleic acid biosynthesis, nucloproteins of mammalian tumour-cell nuclei in (Burdon, R. H., Wykes, J. R. & Wilkie, N. M.) 8P
Protein and nucleic acid synthesis in Protozoa (Newton, B. A.) 87P
Protein biosynthesis, frequency of errors in (Loftfield, R. B.) 82
Protein conformation, relation of, to biological activity (Perlmann, G. E.) 45P
Protein of rat heart, insulin and incorporation of amino acids into (Manchester, K. L. & Wool, I. G.) 202
Protein synthesis in nuclei from rat-thymus gland, effects of X-irradiation on (Smit, J. A. & Stocken, L. A.) 10P
Proteinases, neutral and acid, subcellular distribution and properties of, in brain (Marks, N. & Lajtha, A.) 438
Proteins and peptides, fluorescent end-group reagent for (Gray, W. R. & Hartley, B. S.) 59P
Proteins, basic, from liver nuclei and ribosomes, depolymerization of ribonucleic acid by enzymes in (Martin, S. J., England, H., Turkington, V. & Leslie, I.) 327
Proteins of contractile mechanism of uterus (Needham, D. M. & Williams, J. M.) 552
Proteins of dilution precipitate obtained from salt extracts of pregnant and non-pregnant uterus (Needham, D. M. & Williams, J. M.) 534
Proteins of protoplast membranes of *Bacillus megaterium*, effect of antibiotics on incorporation of amino acids into (Yudkin, M. D.) 290
Proteins, plasma, produced by liver, measurement of synthesis rates of (McFarlane, A. S.) 277
Proteins, solubility of, in the presence of dextran (Laurent, T. C.) 253
Proteins, variation in partial specific volume and frictional coefficient of (Smith, M. H.) 45P
Protoplasts of *Bacillus megaterium*, effect of penicillin, novobiocin, streptomycin and vancomycin on membrane synthesis by (Yudkin, M. D.) 290
Protozoa, metabolism of: Colloquium 87P–90P
Pseudomonas cytochrome *c*-551, amino acid sequence of (Ambler, R. P.) 349
Pseudomonas cytochrome *c*-551, purification and amino acid composition of (Ambler, R. P.) 341
Pseudomonas cytochrome *c*-551, structure of a chymotryptic peptide from (Gray, W. R. & Hartley, B. S.) 379
Pseudomonas oxalaticus (OX1), decarboxylation of oxalyl-coenzyme A to formyl-coenzyme A by (Quayle, J. R.) 492
Pseudomonas sp., metabolism of tartaric acid by (Dagley, S. & Trudgill, P. W.) 22
Pseudomonas sp., oxidation of L-malate by (Francis, M. J. O., Hughes, D. E., Kornberg, H. L. & Phizackerley, P. J. R.) 430
Puromycin, inhibition of incorporation of methionine into cellular structures by (Sirlin, J. L., Jacob, J. & Tandler, C. J.) 447
[1-^{14}C]Pyruvate, effect of pH on metabolism of, by heart muscle (Opie, L. H. & Muller, M. A.) 81P
Pyruvate transaminases in rat liver, subcellular distribution of (Rowsell, E. V., Turner, K. V. & Carnie, J. A.) 65P

Radio-telemetric recording, continuous, of deep body temperatures of some African mammals (Bligh, J. & Beadle, M.) 72P
Reflex, segmental, central control of, in *Schistocerca gregaria* (Rowell, C. H. F.) 82P
Respiratory systems in Protozoa (Grant, P. T. & Bowman, I. B. R.) 89P
Reticulocyte ribosomes, rabbit, isolation, characterization and acid–base properties of ribonucleic acid from (Cox, R. A. & Arnstein, H. R. V.) 574
Reticulocytes and reticulocyte ribosomes, electron microscopy of (Williamson, R., Mathias, A. P., Huxley, H. E. & Page, S.) 13P
Reticulocytes, rabbit, stability of ribosomal aggregates isolated from (Williamson, R. & Mathias, A. P.) 13P
Rhodopseudomonas capsulata, biosynthesis of coproporphyrinogen, magnesium protoporphyrin monomethyl ester and bacteriochlorophyll by (Cooper, R.) 100
Rhodopseudomonas spheroides, production of magnesium 2,4-divinylphaeoporphyrin a_5 monomethyl ester by (Jones, O. T. G.) 182
Rhodymenia palmata, fine structure of xylan from (Manners, D. J. & Mitchell, J. P.) 92P
Ribonucleic acid, action of seminal enzymes on (D'Alessio, G. & Leone, E.) 7P
Ribonucleic acid, amino acid transfer, sequence studies of (Brown, G. L., Lee, S. & McMullen, D. W.) 2P
Ribonucleic acid, depolymerization of, by enzymes in basic proteins from liver nuclei and ribosomes (Martin, S. J., England, H., Turkington, V. & Leslie, I.) 327
Ribonucleic acid from rabbit-reticulocyte ribosomes, isolation, characterization and acid–base properties of (Cox, R. A. & Arnstein, H. R. V.) 574
Ribonucleic acid, high-molecular-weight, terminal-sequence studies on (Hunt, J. A.) 6P
Ribonucleic acid, messenger, growth hormone and polysomes (Korner, A.) 14P
Ribonucleic acid, nucleolar, transfer of the methyl group of methionine to (Sirlin, J. L., Jacob, J. & Tandler, C. J.) 447
Ribonucleic acid, transfer, polyelectrolyte behaviour of (Ascoli, F., Botré, C. & Solinas, M.) 6P
Ribonucleic acid turnover and amino acid incorporation in rat-liver submicrosomal fractions (Hallinan, T. & Munro, H. N.) 95P
Ribosomes and polysomes, isolation of, from rat cardiac muscle (Earl, D. C. N. & Korner, A.) 15P
Ribosomes, assay of, in particle preparations (Jackson, R. J., Munro, A. J. & Korner, A.) 11P
Ribosomes, isolated, interaction of antrycide with (Newton, B. A.) 93P
Ribosomes, liver, depolymerization of ribonucleic acid by enzymes in basic proteins from liver nuclei and (Martin, S. J., England, H., Turkington, V. & Leslie, I.) 327
Ribosomes, reticulocyte, electron microscopy of (Williamson, R., Mathias, A. P., Huxley, H. E. & Page, S.) 13P

Ribosomes, reticulocyte, rabbit, isolation, characterization and acid–base properties of ribonucleic acid from (Cox, R. A. & Arnstein, H. R. V.) 574
Rubber, incorporation of mevalonate and isopentenyl pyrophosphate into, by *Hevea brasiliensis*-latex fractions (Archer, B. L., Audley, B. G., Cockbain, E. G. & McSweeney, G. P.) 565

Saccharomyces cerevisiae, lipoyl dehydrogenase from (Wren, A. & Massey, V.) 47P
Salicylate and amino acid metabolism in the rat (Huggins, A. K. & Smith, M. J. H.) 112P
Salts, effect of, on thermally reconstituted collagen (Candlish, J. K. & Tristram, G. R.) 97P
Saponins, preliminary survey of East African plants for (Peal, W. J. & Patel, M. S.) 82P
Schistosoma rodhaini, studies on (Fripp, P. J.) 74P
Schistosomes, lung-to-liver migration of, in vertebrate host (Wilks, N. E.) 84P
Scrapie agent, comparative infectivities of extracts of tissues and of purified cell fractions from mice infected with (Hunter, G. D. & Millson, G. C.) 42P
D-Serine deaminase, metabolic repression of (McFall, E. & Mandelstam, J.) 391
Shikimic acid, conversion of, into anthranilic acid and phenylpyruvic acids by cell-free extracts of *Aerobacter aerogenes* and *Escherichia coli* (Morgan, P. N., Gibson, M. I. & Gibson, F.) 229
Sialoprotein, extraction of, from bovine cortical bone (Herring, G. M. & Kent, P. W.) 405
Sodium, effect of, on respiration of brain and muscle slices (Hertz, L. & Clausen, T.) 526
Sperm tails, perch, uptake of water by, and its dependence on hydrolysis of adenosine triphosphate (Tibbs, J.) 97P
Sphingolipids, red cell, metabolism of (Shapiro, B. & Statter, M.) 101P
Staphylococcus aureus, nitrate reductase in cell-free extracts of haemin-requiring strain of (Chang, J. P. & Lascelles, J.) 503
Steady state, ultracentrifugal (Creeth, J. M.) 46P
Steroids of cats, urinary, absence of 17-oxo steroids in (Borrell, S.) 51
Steroids of cats, urinary, corticosteroid-like substances in (Borrell, S.) 54
Streptomycin, aerobiosis and action of (Kogut, M. & Lightbown, J. W.) 18P
Streptomycin, effect of, on membrane synthesis by protoplasts of *Bacillus megaterium* (Yudkin, M. D.) 290
Succinate dehydrogenase, influence of oxygen on electron-spin-resonance spectrum of (Veeger, C., Dervartanian, D. V. & van Voorst, J. D. W.) 52P
Succinoxidase activity in lecithinase A-treated rat-liver mitochondria, reactivation of, by lipid extract of rat liver (Casu, A. & Modena, B.) 65P
Sugar composition of oat-coleoptile cell walls (Ray, P. M.) 144
Sulphate, organically bound, distribution of, in bone and cartilage during calcification (Weatherell, J. A. & Weidmann, S. M.) 265
Swamp worm (*Alma emini*), metabolic studies on (Beadle, L. C. & Visser, S. A.) 71P
Sweat of hippopotamus, chemical examination of red dye secreted in (Msuya, P.) 80P

Tartaric acid, metabolism of, by *Pseudomonas* sp. (Dagley, S. & Trudgill, P. W.) 22
Tauro-3β-hydroxyallocholanic acid, effect of, on oxidation of cholesterol by liver mitochondria (Lee, M. J. & Whitehouse, M. W.) 189
Taurohyodeoxycholic acid, effect of, on oxidation of cholesterol by liver mitochondria (Lee, M. J. & Whitehouse, M. W.) 189
Temperature of some African mammals, deep-body, continuous radio-telemetric recording of (Bligh, J. & Beadle, M.) 72P
3,7,11,15-Tetramethylhexadecanoic acid, presence of, in plasma lipids from pregnant and lactating cows (Duncan, W. R. H. & Garton, G. A.) 414
Tetramethyl-*p*-phenylenediamine, phosphorylation coupled to oxidation of, in rat-liver mitochondria (Howland, J. L.) 18P
Thiobarbituric acid, reaction of, with neuraminic acid (Gibbons, R. A.) 380
6-Thioguanine, uptake of guanine, uracil, lysine and glycine by ascites cells pretreated with azaserine and (Adams, D. H.) 240
6-Thioinosine 5′-phosphate, inhibition of inosine 5′-phosphate dehydrogenase from Ehrlich ascites-tumour cells by (Atkinson, M. R., Morton, R. K. & Murray, A. W.) 167
Thiol content of thymus nuclei from control and X-irradiated rats (Deakin, H., Ord, M. G. & Stocken, L. A.) 296
Threonine ethanolamine phosphodiester isolated from fish nervous tissues (Porcellati, G.) 43P
Threonine, identification in urine of 1-aminopropan-2-ol metabolically derived from (Smith, A. D. & Jepson, J. B.) 41P
Thymidine 5′-mono-, 5′di- and 5′-tri-phosphate, mechanism of formation of, by enzymes from Landschutz ascites-tumour cells (Grav, H. J. & Smellie, R. M. S.) 486
Thymus gland, rat, effect of X-irradiation on activation of amino acids in nuclei from (Smit, J. A. & Stocken, L. A.) 37
Thymus nuclei and cytoplasm, calf, deoxyribonucleic acid nucleotidyltransferase activities from (Keir, H. M., Shepherd, J. B. & Hay, J.) 9P
Thymus nuclei from control and X-irradiated rats, 'glucose 6-phosphate-dehydrogenase' activity and thiol content of (Deakin, H., Ord, M. G. & Stocken, L. A.) 296
Thyroid gland, rat, incorporation of ^{131}I into iodothyronines of (Plaskett, L. G., Barnaby, C. F. & Lloyd, G. I.) 479
Thyroid hormone, influence of changes in concentration of, on the rate of amino acid incorporation by rat-liver mitochondria *in vitro* (Bronk, J. R.) 16P
L-Thyroxine, conversion of, into 3,3′,5-tri-iodo-L-thyronine glucuronide in the rat (Lloyd, G. I. & Plaskett, L. G.) 95P
Toad heart, isolated, isolation from human blood plasma of substance having positive inotropic action on (Curtain, C. C. & Nayler, W. G.) 69
Trachea, bovine, degradation of dinitrophenyl-chondropeptide from (Kent, P. W. & Stevenson, F. K.) 114P
Transferrin, human, metal ion-binding with (Perkins, D. J.) 93P
Trifolium incarnatum, formation of (+)-pinitol, *dextro*-inositol and sequoyitol from *meso*inositol in leaves of (Scholda, R., Billek, G. & Hoffmann-Ostenhof, O.) 31P
Triglyceride fatty acids of chylomicra and low-density lipoproteins, uptake of, from blood, by goat mammary gland (Barry, J. M., Bartley, W., Linzell, J. L. & Robinson, D. S.) 6
3,3′,5-Tri-iodo-L-thyronine glucuronide, conversion of L-thyroxine into, in the rat (Lloyd, G. I. & Plaskett, L. G.) 95P
Trypanosoma brucei subgroup, infectivity of trypanosomes of, during acute relapsing infections in rats, correlated with antibody response of infected rats (Cunningham, M. P., van Hoeve, K. & Lumsden W. H. R.) 73P
Trypanosoma brucei subgroup, survival of trypanosomes of, at low temperatures (Cunningham, M. P., Lumsden, W. H. R., van Hoeve, K. & Webber, W. A. F.) 73P

Trypanosomes, electrophoretic behaviour of (Hollingshead, S., Pethica, B. A. & Ryley, J. F.) 123
Trypanosomidae, respiratory systems in (Grant, P. T. & Bowman, I. B. R.) 89P
Trypsin, action of, on human α-lipoprotein (Ashworth, L. A. E. & Green, C.) 561
L-Tryptophanase, metabolic repression of (McFall, E. & Mandelstam, J.) 391
Tyrosine *O*-sulphate in fibrinogen and fibrin (Jevons, F. R.) 621

Ubiquinone, conversion of, into ubichromenol in yeast (Stevenson, J., Hemming, F. W. & Morton, R. A.) 58P
Ubiquinone, endogenous, relationship between respiratory chain of crab mitochondria and (Burrin, D. H. & Beechey, R. B.) 111P
Ultraviolet radiation, effects of, on nicotinic acid and related compounds (Abelson, D. & Boyle, A.) 19P
Uracil, uptake of, by ascites cells pretreated with azaserine and 6-thioguanine (Adams, D. H.) 240
Urethane, metabolism and possible mode of action of (Boyland, E., Nery, R., Peggie, K. S. & Williams, K.) 113P
Uridine diphosphate glucose–glycogen transglucosylase (Larner, J., Rosell-Perez, M., Friedman, D. & Craig, J.) 36P
Uterus, human, formation and breakdown of collagen and elastin in, during pregnancy and post-partum involution (Woessner, J. F., jun. & Brewer, T. H.) 75
Uterus muscle, salt-soluble collagen in extracts of (Needham, D. M. & Williams, J. M.) 546
Uterus, pregnant and non-pregnant, proteins of dilution precipitate obtained from salt extracts of (Needham, D. M. & Williams, J. M.) 534
Uterus, proteins of contractile mechanism of (Needham, D. M. & Williams, J. M.) 552

Vancomycin, effect of, on membrane synthesis by protoplasts of *Bacillus megaterium* (Yudkin, M. D.) 290
Viridicatol from *Penicillium viridicatum* (Birkinshaw, J. H., Luckner, M., Mohammed, Y. S., Mothes, K. & Stickings, C. E.) 196
Viruses, chemical relationships between nucleic acids obtained from (Markham, R.) 2P
Vitamin A, excess of, and mitochondrial swelling (Lucy, J. A., Luscombe, M. & Dingle, J. T.) 419
Vitamin A, serum and liver concentrations of, in Ugandans (Leonard, P. J.) 77P
Vitamin B_{12}, biological activities of analogues and coenzyme forms of (Smith, E. L.) 5P
Vitamin B_{12}, biosynthesis of, in micro-organisms (Boretti, G.) 3P
Vitamin B_{12} derivatives, non-enzymic interactions between thiols and (Peel, J. L.) 5P
Vitamin B_{12} in the synthesis of methionine (Woods, D. D.) 4P

Wax from leaves of *Cymbopogon citratus*, nature of major constituent of (Crawford, M. A. & Menezes, F. A.) 72P
Wheat leaves, 'compartmentation' of acids in (MacLennan, D. H., Beevers, H. & Harley, J. L.) 316

Xanthine–oxygen oxidoreductase isolated from pig liver, properties of (Brumby, P. E. & Massey, V.) 46P
X-irradiation, effect of, on activation of amino acids in nuclei from rat thymus gland (Smit, J. A. & Stocken, L. A.) 37
X-irradiation, effects of, on protein synthesis in nuclei from rat thymus gland (Smit, J. A. & Stocken, L. A.) 10P
Xylan from *Rhodymenia palmata*, fine structure of (Manners, D. J. & Mitchell, J. P.) 92P

Yeast, preparation of crystalline forms of ferricytochrome b_3 and ferrocytochrome b_3 from (Morton, R. K. & Shepley, K.) 257

β-Zeacarotene, role of, in carotenoid cyclization (Davies, B. H., Villoutreix, J., Williams, R. J. H. & Goodwin, T. W.) 96P
